

INDUSTRIAL SECTOR

The Nigerian industrial sector includes basically Manufacturing, Construction and Mining. The industrial sector was responsible for about 20% of total Nigerian Energy Demand. In addition to emissions from the energy used, the sector also emitted some quantity of CO₂ directly from its processes. 10% of the total energy demand was supplied by traditional fuel, 42% by Electricity, 4% by liquid fuels, 33% by gaseous fuel and the rest by feedstock and coke with steel coal. The sector is divided into Growth in Industry and Energy Intensity.

The Industrial Sector is a function of the following choices with levels (1-4) selection:

- **Growth in Industry**

Choice levels

1	2	3	4
---	---	---	---

- **Energy Intensity**
